

Create a react application with CRA

1. Try to make a signup form with below fields:
  - a. Name
  - b. Email
  - c. Phone
  - d. Address
  - e. Password
2. Also add the CSS to make it look good.
3. Try to make reusable components.
4. Now you need to add states in this
5. Add a submit event and on submit console log the form values which you have in state
